CAPSTONE 2

THE MAIN STORY

Chapter 1: Academic Pressure

Main character(Player’s Log in Names).

The entire chapter happens around one important school deadline.

House (wakes up and sees reminders of school.)
↓
Classroom (The teacher announces the upcoming deadline/exam.)
↓
Cafeteria (hears classmates talking about their progress and starts comparing themself to others.)
↓
Dormitory (alone and starts overthinking everything.)
↓
Coping activities (learns to stop, examine their thoughts, breathe, and reflect.)
↓
Ending (realization)("I don't have to solve everything at once. I can take one step at a time.")

EPISODE 1 — HOUSE

objects around the room

- Phone
- Laptop
- school bag
- Books

The player can interact with these objects.

First interaction — Phone
Player presses:
E — Interact

Phone displays:

Reminder
Research Project Submission
Tomorrow — 11:59 PM

"Tomorrow already?"
(other deep thinking about pressure.)
This immediately introduces the academic pressure.

Laptop
Alex sees unfinished work.

Dialogue:

(Player Name:)
"I haven't even finished the first part."

Then give the player a choice:

CHOICE
A. "I'll finish everything tonight."
B. "I'll start with one task first."
This is important because your game has decision-making.

If A:
(Player Name:)
"I have to finish everything tonight. I can't fall behind."
The game continues normally.

If B:
(Player Name:)
"Maybe I should just start with one part."
This creates slightly different dialogue later.

Don't make complicated branching.
Just record the choice.
(That is to demonstrate our decision-making system in the papers.)

FIRST CBT (Cognitive Behavioral Therapy) FEATURE — THOUGHT IDENTIFICATION

After interacting with the laptop, (Players) gets an internal thought:
"What if I fail this project?"
Then display:

"What are you feeling?"
Options:

- Worried
- Overwhelmed
- Frustrated
- Calm

The player selects one.
This directly connects to:
Mental Self-Awareness

(Before going to school or leaving the house there are house chores need to do. Just like real life scenario. Don’t need to be have a full trip to school, when the player is on outside just put specific spot where the player should stand and it can be like another animation trip to school. When arrive at school it doesn’t need to be big, it can start at outside then just walk inside the school/classrooms for episode 2.)

EPISODE 2 — CLASSROOM

Now (Players) arrives at school.
(School/classrooms) scene doesn't need to be huge.

· classroom
· teacher NPC
· classmates
· desks
· board

Teacher announces:
Teacher:
"Remember that your project presentation is tomorrow. Make sure your work is ready."

(Players):
"Tomorrow..."

Then another student talks.
Classmate:
"I'm almost finished with mine. I just need to polish a few things."

(Players) thinks:
"They're already finished..."
This introduces social comparison.

NPC DIALOGUE
The player can talk to a friend.

Friend:
"You look worried. Everything okay?"

Player choices:

A. "I'm fine."
B. "I'm having a hard time keeping up."
C. "I don't know if I can finish everything."

If A:
Friend:
"Okay. But if you need help, just let me know."

If B:
Friend:
"You don't have to finish everything at once. What part are you working on?"

If C:
Friend:
"Take it one step at a time. You can start with the part you understand."
Again:

(Doesn’t need to create three completely different stories).
Let the dialogue converge afterward.

BREATHING EXERCISE
This is where your existing:

After the classroom interaction, (Players) becomes overwhelmed.

Screen:
Alex feels overwhelmed.

Then:
"Take a moment."
NPC/friend:
"Let's slow down for a moment. Take a breath."
Then launch breathing minigame.

After completion:
(Players):
"I feel a little calmer."

Notice the wording.
NOT:
"My anxiety is cured."
Instead:
"I feel a little calmer."
Much safer and more consistent with your project.

EPISODE 3 — CAFETERIA
"Everyone Seems Ahead"
This is actually a GREAT place to demonstrate emotional awareness.

(Players) enters cafeteria.
Two or three NPCs are talking.

Student 1:
"I already finished my presentation."

Student 2:
"Same. I'm just practicing now."

(Players) thinks:
"Everyone is ahead of me."

Then:
"Maybe I'm not good enough."

Now introduce:
THOUGHT COURTROOM

The screen changes.
Title:
THOUGHT COURTROOM
Thought:
"Everyone is ahead of me, so I'm not good enough."

Then:
Evidence FOR
Player can choose:
"I haven't finished my project."
"Other students seem prepared."

Evidence AGAINST
Player can choose:
"I don't know how much they actually completed."
"I have completed parts of my project."
"Being behind does not mean I will fail."

Then:
Balanced Thought
Player creates/selects:
"Other students may be ahead, but I can still work on my project one step at a time."

Then:
Thought Examined

EPISODE 4 — DORMITORY

Now we return to the dorm.
This is the emotional conclusion of Chapter 1.

"One Step at a Time"
Now we return to the dorm.

This is the emotional conclusion of Chapter 1.

Alex sits at the desk.
The player sees:

- unfinished project
- laptop
- notebook
- Phone

(Players):
"I still have a lot to do."

Pause.
"But I don't have to finish everything at once."

Player can interact with the laptop.

Task List
Instead of:
Finish entire project

Show:

TODAY'S TASKS
☐ Finish introduction
☐ Review references
☐ Prepare presentation slides
☐ Practice presentation
Then the player completes one small task.

REFLECTION JOURNAL

After completing the task:
Reflection Journal

Prompt:
"What did you learn about how you handle pressure today?"

Player types:
"I learned that I become overwhelmed when I think about everything at once. Breaking my work into smaller tasks helped me feel more in control."

Then:
SAVE ENTRY
This gets stored in your online database.

ASSESSMENT
At the end of Chapter 1:
Self-Reflection Assessment
Example:
How overwhelmed did you feel during today's events?
1 — Not at all
2 — Slightly

3 — Moderately
4 — Very
5 — Extremely

Then:
What coping strategy did you find most useful?

- Taking a breathing break
- Examining my thoughts
- Talking with someone
- Breaking tasks into smaller steps
- Reflection

Then result:

Your Reflection
You recognized that academic pressure can affect your thoughts and emotions. You also identified strategies that may help you manage stressful situations.

Again:
NOT a medical diagnosis.
